Subject: I need a quick update on Bayou Corne
Date: 10/09/2012 10:36 AM

The bosses have called a series of meetings on Bayou Corne today. Could one of you find out from LDEQ the status of the RELIEF wells, in particular, the one planned to go in between the sinkhole and the community. And find out the status of the debris cleanup, at least get the quantity of how many trucks have been hauled off.

Thanks. I'm in other meetings until the BC meetings but call me if you need to.
